About us

Dar Al Muhallab is a Kuwait based Mechanical Contracting & Services Company.

We specialize in Structural Fabrications & Erections, Piping works including Stainless Steel, Carbon Steel, HVAC Pipelines & Maintenance Works, Tank construction, welding and erection works, Container refurbishment works. Our proven track record with quality, safety, and goal setting to have zero tolerance to failures and lost time.

History

Dar Al Muhallab was formed originally as a general mechanical services company. Being part of one of the biggest business groups in Kuwait, DAM diversified into a new division handling all Structural & Mechanical works.

People & Leadership

From inception DAM has been structured as a professionally driven company with top management inculcating a strong work ethic formulating short and long term business goals to achieve policy implementation, strategic intent, content and corporate objectives set forth by technical experts.

Fabrication

DAM provides shop fabrication and on-site fabrication services for project supply and construction needs. We provide quality work on time sensitive schedules. We have the ability to work on challenging projects having proven our mettle in the field.

Erection

DAM is in a prime position among companies in this sector for its ability to cope with the rigorous challenge of ensuring the safety, quality and strict adherence to the deadlines agreed in the execution of projects and maintenance of industrial plants. In-house erection and allow DAM to take full responsibility for the smooth execution of work undertaken from clients. This experience and the work effort of qualified personnel is the reason for their presence in the field.

We shoulder the responsibility to integrate our mission with that of the client and accompany them along the entire lifecycle of a project.
